Using Struts2 with Hibernate and GWT (Google Web Toolkit) I am trying to add GWT to my project which is a GWT web application running on Struts2. I am following the book "Getting Started with GWT: Developing Google Web Applications with Java and JavaScript", and as it says I have to add the GWT plugin to the top-level build.xml in the project. The trouble is I am using a Maven project. The project has two modules which have their own pom.xml files and are under a parent pom.xml. I have tried adding the GWT plugin to the root pom.xml and then also under the parent's pom.xml and get an error when I do that.

The error is: [INFO] ----- [ERROR] BUILD FAILURE [INFO]
----- [INFO] Reactor Summary: [INFO] [INFO] GWT
Desig..... FAILURE [0.218s] [INFO] GWT Plugi..... SKIPPED [INFO] BUILD FAILURE
[INFO] Total time: 2.497s [INFO] Finished at: Tue Mar 25 13:05:23 IST 2012 [INFO] Final Memory: 10M/151M [ERROR]
